

Talent Tracker

Document Information

Item	Details
Project Name	Talent Tracker
Document Name	Project Scope Statement
Version	1.0
Prepared By	Ayushi Agarwal
Project Type	Academic Team Project

1. Project Purpose

The purpose of Talent Tracker is to provide students and job seekers with an AI-powered platform to simplify career preparation by offering resume creation, AI-generated cover letters, authentication, and industry insights in one application.

2. Project Goal

To develop a responsive web application that helps users prepare professional job application materials while improving accessibility to career-related resources.

3. In Scope

The following features were included in the project:

User Management

- User Registration
- User Login
- Authentication using Clerk

Resume Module

- Resume Builder
- Resume Editing
- Resume Preview

AI Features

- AI-generated Cover Letter
- AI-powered Industry Insights

Dashboard

- User Dashboard
- Profile Management

Deployment

- Deployment using Vercel
- GitHub Repository Management

4. Out of Scope

The following features were intentionally excluded:

- Mobile Application
- Interview Scheduling
- Job Portal Integration
- Payment Gateway
- Multi-language Support
- Recruiter Dashboard

5. Deliverables

The project deliverables include:

- Functional Web Application
- Source Code Repository
- AI Integration
- Deployment on Vercel
- Project Documentation

6. Assumptions

The project assumes:

- Users have internet access.
- AI services remain available.
- Supported web browsers are used.
- Authentication services remain operational.

7. Constraints

- Academic project timeline
- Team size of three members
- Limited budget
- Dependence on third-party APIs
- Free cloud service limitations

8. Acceptance Criteria

The project will be considered complete when:

- Users can successfully register and log in.
- Resume Builder functions correctly.
- AI-generated cover letters are generated successfully.
- Industry insights are displayed.

- The application is successfully deployed.

9. My Contribution

My primary responsibilities included:

- AI Integration
- GitHub Repository Management
- Project Documentation
- Application Deployment using Vercel
- Support during testing and final delivery

10. Future Enhancements

Potential future improvements include:

- Mobile application
- Job recommendation system
- Resume scoring
- Interview preparation module
- Recruiter dashboard
- Multi-language support
- Analytics dashboard
